### WHY GO ANYWHERE ELSE?

At HTG we have preconfigured Home Automation packages for you so you know what your cost will be now.

### Home Automation Packages

**HA Package # 1 - Adding The Basic Brain** - The second step to building your green hi tech home. When you add controller or "Brain" to your home you now have taken the step to controlling your home:

The controller is all the intelligence you will need for future upgrades and will add value to your home.

- The Controller is the central home infrastructure or "Brain".
- Allows you to add and control all home automation web access, touch screens as you desire if you are not purchasing one of our pre-engineered solutions.
- Will give you the ability to have the same functions as many traditionally stand alone systems would give you at one or no monthly central station monitoring cost. How? The Brain has built in auto-dialers to notify you or your selected monitoring station.
- Package includes: A UL listed alarm panel, security system, which is central station compatible. Thermostat and lighting control ability, "life Alert" functionality for active seniors and medical emergencies, Internet and PDA accessible, Dial in telephone control with 2 way talk and listen ability.
