

**HAI systems
can be installed in both
new and existing construction.**

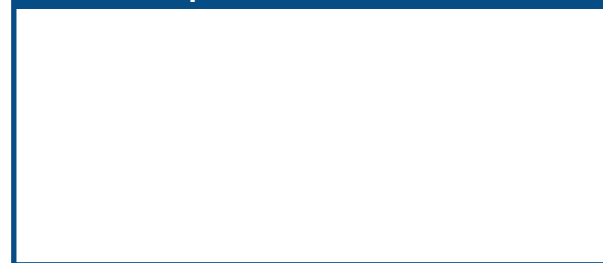

HAI products are sold through a worldwide network of distributors and are installed by dealers in over 80 countries. For information on any of HAI's award-winning products, please visit www.homeauto.com to contact an HAI dealer near you.

**HAI: A proven track record of reliable,
affordable, and award-winning prod-
ucts since 1985.**

Home Automation, Inc. (HAI) was formed in 1985 to provide automation products to the newly emerging automation and controls market. HAI is responsible for many industry firsts in security and automation systems and Internet remote access and control software. HAI's products are designed and intended for professional sale, installation, and service. Your HAI dealer can discuss and advise you on what options are best for your facility. Visit www.homeauto.com to find a dealer near you.

Building Management

**Reduce energy costs
with an efficient and
simple to use building
management system**

**Now small to medium
facilities can enjoy
the benefits of advanced
security, surveillance, and
energy management,
all through intuitive custom
user interface options.**

Take advantage of energy savings with the system that grows with your business.

Control Systems

Monitor and control your entire building from a simple to use yet advanced full color Touchscreen interface. Get real-time information via RSS Feed and even current weather conditions. Check live camera video and control your in-store media sources.

Surveillance

HAI's imposing high-resolution cameras keep a watchful eye on your business. Add the Network Digital Video Recorder (NDVR) to record video from up to four cameras. Additional NDVRs expand the number of cameras. View recorded video and four live cameras at your convenience on or off site. View remotely on a Smartphone/PDA or any Internet-connected computer around the world.

Access Control & Security

Prevent unauthorized access to sensitive areas while also managing and tracking employee activity. Access cards and keytags are tied to specific individuals. Customize user access based on authority level and time/date of validity.

Energy Management

Control up to 64 programmable thermostats to reduce energy use and increase your bottom line. Monitor and control temperature and humidity in garages, greenhouses, basements, and coolers. Settings can change based on occupancy. Also prevent phantom loads from water heaters, fountain or pool pumps, generators, and ceiling fans for even more savings.

HAI automation systems provide an affordable commercial automation solution.

Lighting

Gain total control over lighting throughout your business' location to improve security while also contributing to savings on your energy bill. Control interior and outdoor lights, including signage. Automatically set lighting levels based on occupancy, time, or event. Unused lights will turn off when leaving the building and restore automatically upon return.

Multi-Room Audio

Multi-room audio systems are ideal for small commercial operations like medical offices, retail stores, or restaurants. Along with allowing different music to be played in different rooms, employees can use a regular telephone to make an announcement throughout the premises.

HAI has a pre-assembled Promo Kit for Commercial Security and Access Control. This kit includes everything you need to get started. Ask for "Promo2CommSec."
