

## Barbara A. Harper BS, DC

Is a retired NJ Licensed Chiropractic Physician who is currently employed as a higher education Science Instructor teaching Anatomy and Physiology, Chemistry, Biology, etc. both in the classroom and On-Line. Dr. Harper also attends Penn State University pursuing a Master's Degree in Educational Technology.

While growing up within a family of several career Registered Nurses, Dr. Harper learned to appreciate the need for supportive health protocols and has dedicated her life to high quality patient care. She is married to her husband, Robert, for over 40 years and has two sons.

Dr. Harper's vision for the future falls directly in line with the growing popularity of professionals in the healthcare industry who embrace the use of technology as a positive holistic compliment to the aging population's health care, family obligations, communication and self-sustaining independent lifestyles. "The Science of medicine and technology investigates solutions and strives to promote health for all. There are many reasons why technology must be made available to those we care for before they are unable to provide for themselves, become ill or disabled while continuing to maintain their dignity, happiness and contentment. The GrandCare System is an amazing user-friendly product that combines love and caring with low-cost technology and peace of mind.

Try it and I know that you will love it."
